

About 300 to join continuing students during today's second session signup

Approximately 300 new students will join those sticking out summer school for another session during registration today in the East Gym of the Smith Fieldhouse.

Y named payoff site 2nd time

BYU has been selected as site for the NCAA Western Regional Basketball Playoffs, in 1963, it has been announced by University officials.

According to Edwin R. Kimball, director of athletics for the Cougars, who made the announcement, BYU was notified it will host the tournament in a letter from Bernie A. Shively, chairman of the NCAA basketball committee.

The tournament, Mr. Kimball said, is scheduled for March 15-16, 1963, in Smith Fieldhouse. It will mark the second year in a row that BYU has staged the Far West playoff. Winner of the tournament will enter the four-team national finals the following week.

The tourney was awarded BYU for the first time in 1962. It was the first time the Western Regionals had ever been staged anywhere in the Intermountain Area. Capacity crowds witnessed playoff action both nights, and both the University and Provo received much favorable comment for the manner in which the tournament was handled.

Utah State represented the now-defunct Skyline Conference in the tournament which was eventually won by UCLA, Big Five representative. Oregon State and Pepperdine were the other schools represented in the playoff at Provo.

In making the announcement, Mr. Kimball said he was pleased with the NCAA Committee's choice and hoped that the school and other groups responsible for the tournament would be able to improve on the 1962 playoffs.

"This is great basketball country," said Kimball, "and I'm sure the fans will appreciate the fact that the tournament has been returned to Provo for another year."

Orientation head asks help in fall

Many students are needed to help with fall orientation, according to Wayne Young, orientation chairman.

Orientation activities sponsored by AMS and AWS include greeting new students at bus and train stations and driving them to campus and providing campus information books.

YOUNG SAID help is needed 24 hours a day, starting Sept. 15 and continuing through Sept. 22.

Students interested in working on the bulletin board outside 180 Student Service Center or call Young at FR 3395.

SUMMER SCHOOL Director Dean A. Peterson said approximately two-thirds of the 3,500 students enrolled for first session will continue second session. With the 300 to 400 students who should enter today, the second session enrollment should be 2,600 to 2,700. Enrollment always has dropped during the second half of the summer term, he said.

The majority of continuing students registered for second

Homecoming sets activities for '62 event

"Ahead of the West"—BYU's Homecoming 1962—will be celebrated Oct. 29-Nov. 3.

A full slate of activities has been planned for the week, according to Dan Lau, Homecoming chairman.

A two-hour Fieldhouse Frolics featuring top BYU talent and a name attraction of the calibre of Red Skelton or Pat Boone has been scheduled for Nov. 3, reported Lau. Contract for the name attraction has not yet been signed.

THE HOMECOMING assembly on Nov. 2 will be written and directed by Buddy Youngreen, student writer and producer.

Other events will include voting for Queen, Oct. 26; forum, dance, Oct. 21; queen's banquet, Nov. 1; Homecoming dance, Nov. 2; parade, BYU vs. U. of New Mexico and alumni dinner and dance, Nov. 3.

Helping Lau as committee members are Marilyn Brown, Gordon Thornton, Jane Steed, John Jay, Jeff Willis, Dwayne Knight, Irene Jensen, Rebecca Day, Susan Woodcock, Janice Brer, Norm Nielsen, Diane Dredge, Mr. Youngreen and Linda Beasley.

In making the announcement, Mr. Kimball said he was pleased with the NCAA Committee's choice and hoped that the school and other groups responsible for the tournament would be able to improve on the 1962 playoffs.

"This is great basketball country," said Kimball, "and I'm sure the fans will appreciate the fact that the tournament has been returned to Provo for another year."

Many students are needed to help with fall orientation, according to Wayne Young, orientation chairman.

Orientation activities sponsored by AMS and AWS include greeting new students at bus and train stations and driving them to campus and providing campus information books.

session classes at the beginning of the summer so need not attend registration today. Continuing students who haven't registered for second session classes should do so between 8 a.m. and noon or between 1 and 5 p.m. today.

STUDENTS WHO ARE registering for the first time this summer, registering in alphabetical sequence listed in the summer school catalog.

Continuing student may register Thursday at A-153 Student Administration Bldg. without paying a late fee. However, new students must pay a late registration fee of \$2.50 after today.

ALL CLASSES ARE being held today. The only students who might need to miss classes because of registration are those who are enrolling for the first time this summer and are registering in alphabetical sequence.

All classes will meet Saturday, according to Director Peterson.

Monday crash during storm claims senior

A senior from Calgary, Canada, who was to graduate in August was killed Monday night when his car went out of control in a blinding wind and rain storm in Provo Canyon.

Joseph Alan McIlhagga, 24, died at approximately 9 p.m. when his car left the road, climbed a mountainside bank and rolled back, coming to rest upside down, according to Deputy Sheriff Newell Knight who investigated.

McIlhagga was alone in the car, traveling up the canyon to see his fiancée who lives in Kamas.

The business administration major resided at 311 W. 5th North in Provo.

Deputy Sheriff Knight said the rain was coming down in torrents, whipped by a high wind at the time of the accident. The body was taken to the Olpin Mortuary in Heber, where it awaits disposition from his family in Canada.

Oldster defies paper's advice, makes Timp top in annual hike

An 83-year-old Salt Lake City man Saturday defied the advice in the June 22 Provo Herald that the aged should not attempt the Timp Hike. He replied with a letter to the editor in the July 5 issue of the paper and made the Timp summit during the 51st annual climb.

THIS OCTAGENARIAN, Milton Ross, was the oldest person to climb the seven miles from Aspen Grove to the top of Timp Saturday. Evidencing his many years of reaching the summit in the hike, Mr. Ross' hat was decked with many Summit Club badges.

The youngest hiker to climb the seven miles was JoLene Taylor, 4, from Kentucky, who accompanied her mother and father. Mr. Taylor is a service man and he and his family were just passing through the area.

ACCORDING TO DR. Israel Heaton, hike chairman, 1959 persons patterned to Timp's peak Saturday and earned themselves membership in the Summit Club as well as Summit Club badges.

He said at least 4,000 persons were on the trail, but some stopped at Emerald Lake and others turned around before they reached the lake.

(Continued on page 2)

LOUISE F. LAKE

Mrs. Lake to talk from wheel chair

"The first woman to be chosen Handicapped American of the Year" will speak at Thursday's assembly.

Louise J. Lake will talk at 10 a.m. in Smith Auditorium, according to Dr. Dean A. Peterson, summer school director.

MRS. LAKE, who has been confined to a wheel chair since she was stricken with paralysis in 1945, will discuss "Build a Year Blessings." She was presented with the "Handicapped American of the Year" award in 1962 by former President Dwight D. Eisenhower for "having made the greatest contribution to the rehabilitation and employment of the physically handicapped."

Presently field representative for the National Society for Crippled Children and Adults, Mrs. Lake gives consultation on the interpretation of the society's national attack against architectural barriers. She also initiates community action on his project, which is designed to modify existing buildings and influence the construction of new ones so they can be accessible to 22 million handicapped Americans.

REPRESENTING THE Institute of Physical Medicine, Mrs. Lake attended the Chilean-North American Cultural Week, sponsored by the American Embassy in Santiago in 1961. She was made an honorary member of the Chilean Society for Crippled Children and Adults.

While she was living in Utah, Mrs. Lake served on the Utah State Board on Employment of the Physically Handicapped and the Utah Chapter of the National Rehabilitation Association.

She was director of volunteers and lecturer at New York University Medical Center's Institute of Physical Medicine and Rehabilitation, member of the President's Committee on Employment of the Physically Handicapped, and chairman of the hospitality committee for the physically handicapped at the Eighth World Congress of the International Society for Rehabilitation of the Disabled in New York in 1960.

AHEAD OF SCHEDULE — A crane moves cement and a man from a cement truck to a wheelbarrow on building at the new Physical Plant Bldg. Construction is two weeks ahead of schedule on the building started in February and scheduled for

completion in November. The construction site is 9th North and 1st East. The completed building will house the Physical Plant operation which is now scattered in 26 temporary buildings.

Literature fan, science major heads English

by Diana McFarland
Universe Assistant Editor

A man who once hated to study English and who majored in a scientific field in college today heads the BYU English Dept.

Dr. Bruce B. Clark came out of high school "hating the formal study of English, but possessing a tremendous love for literature."

"I CANNOT REMEMBER when I didn't read," he said. "In high school I read about one novel a day."

"I did a great deal of memorizing of poetry; I was consumed by a passion for Tennyson and Poe—until I outgrew them," he reminisced.

Dr. Clark recalled writing short stories and poetry as early as 12 years of age. Between the ages of 15 and 20, he wrote a volume of poetry, "Frayed Edges," from which certain selections have been published.

HOWEVER, HE CAME to college planning to major in science and, at one time, was named the outstanding student of chemistry at the University of Utah. As an undergraduate, he taught chemistry at that institution for one year.

"...but the love of literature, the love of people and human values, drew me from the world of facts, figures and things, which is science," he commented.

"I have the highest regard for science," he explained. "But, to me, literature is whole, for it concerns the world of human beings and their lives; all other fields, in comparison, are fragmentary."

DR. CLARK WAS recently included in the 1962 "Who's Who in America."

Several years ago, he was chairman of the committee that shaped the interdisciplinary Humanities Major at BYU. He supervised that program for several years until he was made Chairman of the English Dept.

Dr. Clark has written a number of scholarly articles which have been published in various literary magazines.

He is currently engaged in writing a critical biography of Oscar Wilde for the Twayne Publishing House of New York City. He is collaborating with Prof. Robert Thomas on a critical anthology of literature for the LDS Church, to be published in one and one-half years.

Criticizes play as drama...

'Mantle of Prophet' excellent as poetry

by Christie Coles
Provo Post

Clinton F. Larson is to be commended on his play "Mantle of the Prophet." The title is excellent; the choice of material, good; and the manner in which it is handled, admirable.

Writers of this region have a reservoir of material upon which they should draw. Dr. Larson has a vitality which particularly lends itself to this genre.

THE PRESENTATION of the play, Thursday and Friday to distinguished audiences, was well received. It was acted well, particularly by Chet Harris, as Brigham Young, Arbon Christensen, as John Anderson, and Robert Hicks as Governor Ford. Donald Nelson did well as an ineffectual Sidney Rigdon, although one felt that any moment he might be lost within his coat. Kay Rogers, who played Nancy Danton, was very pleasing to the eye, and ear. (She coughed well, too.)

However, the play was less than perfect. The ponderous, long speeches (written by a true poet) in metaphoric pentameter, were reminiscent of Sophocles and Euripides in their prologues. And, as prologues, they could have been accepted.

Many viewers of the play felt that it was too poetic and not dramatic enough. They felt that the author is too much of a poet to be a playwright.

THE MEN STEPPED out of character too greatly in the second act when they could laugh at a casket similar to the one in which their prophet was buried. In fact, the un-nailing of the casket, and the threats and words at that time were beyond the pale of good taste. Viewers were squirming. And suggestion is always stronger than complete telling.

The third act "played" better because of the activity, and the number of people on stage. However, to me, it demeaned Brigham Young to have him forced to plead his cause so long after the mantle had fallen on him. Could this speech not have been made before? And could not the mantle have been put in place by some mechanical means? Or, at least while the stage was completely darkened?

THE LAST LOVE SCENE was banal, repetitious and unnecessary. (Maybe this was not entirely Dr. Larson's fault.)

But one should not quarrel because of these few flaws. "Mantle of the Prophet" is part of the renaissance which must take place in the American theatre if it is to survive. We need writers, such as Dr. Larson, who do not equivocate or rationalize; who have strength and courage, and purpose; who will say with the writer who said, "I am only one voice, but I am a voice."

Night school slates sign up today in office

Registration for second session classes of BYU Evening School will be held today.

The Evening School office is located in 272 Student Service Center and will be open from 8 a.m. to 9 p.m.

INCLUDED in the variety of classes to be offered second term will be Bible 411, the Life and Teachings of Jesus, taught by Richard L. Anderson; Health Education and Safety, taught by Henry J. Nicholas; and Introduction to Literature, taught by Harold S. Madsen. A special course for seniors and institute instructors will be led by Alan Anderson.

Complete information on the evening class schedule can be obtained by calling the Evening School office, Ext. 2873.

Oldster makes top in spite of advice against trying hike

(Continued from page 1)

A 17-year-old Provo youth, Scott Miller, made it to the high apex of the mountain for the 11th consecutive year.

A 22-YEAR-OLD Provo teacher, Margaret Atkinson, received her 12th Summit Club badge.

President of the Western Club Neil Swan was too early a bird at the top. He reached Timb Summit some time before 5 a.m. and had already departed by the time the group who had the badges arrived at 5:30 a.m. Approximately 60 persons waited on the top when the badges arrived. Dr. Heaton said, "Dr. Heaton reported that there were no serious accidents during the climb. He said the few minor accidents which occurred were caused by hikers cutting trail and causing rocks to roll. One or two persons overcome by heat were carried down the trail on stretchers, he said."

VARIED CLIMBERS—From left, Jack Stone, visitor from Alberta, Canada, on way to Arizona; Steve Gilchrist, son of Vede Gilchrist, a BYU sophomore; Ned Solomon, a BYU senior; and Todd Solomon, Ned's brother, eighth grader at BY High, enjoy a leisurely Saturday hike to the Y.

Photo by David Rust.

Y Mount not another Timb, but important to area people

Maybe Y Mountain doesn't attract so many distant hikers as does Timpanogos but to BYU students and residents of the Provo area, it seems to be an important hike spot.

A Summer Universe reporter said during a recent Saturday climb to the Y letter he met a family and several youngsters, as well as BYU students. He said he was surprised at the number and variety of persons making the hike.

The trail to the block Y is quite steep but relatively short. It is approximately a mile from the topmost spot to which cars can drive to the Y.

Many who have climbed to the Y report that the view of the Provo area from there is breathtaking and the air is refreshing.

Still searching for chairman of senior breakfast

A chairman is needed for the senior breakfast which will be held a week before the end of second session.

Applicants for the position should be at least juniors and should be organizers, according to Studentbody President Dale Harris.

Harris will interview interested students in his office, 152 Student Service Center, weekdays mornings between 8 and 10. Those who cannot be there between these hours should contact Harris to arrange an appointment at another time.

2 Y profs leading Cumorah Pageant

Two BYU department chairmen play the most important roles in the production of the annual Hill Cumorah Pageant in New York.

CHAIRMAN OF THE Speech and Dramatic Arts Dept., Dr. Harold I. Hansen, has been sole director of the 20 performances of the music-drama since 1937.

Since he directed the first pageant, the performances have been increased from one night to four, the cast has grown to 300 and the number of spectators has swelled to approximately 100,000 a year.

Chairman of the Music Dept., Dr. Crawford Gates, who has written 220 original works and 300 arrangements, composed the special music for the Pageant which has been used since 1937. The score covers 285 full orchestral score pages.

THE 300-VOICE combined BYU choir, the 80-member Utah Symphony Orchestra and the Tabernacle Organ of 11,000 pipes performed the music which is recorded on five-track stereophonic tape.

The Pageant, a dramatization of the Book of Mormon story, began in a modest way 25 years ago with only a few improvised stage properties and has been presented each year since then with the exception of five years during and immediately after the war.

ITS 25TH ANNIVERSARY performances Aug. 1, 2, 3 and 4 will find it equipped with more than \$500,000 worth of buildings, theatrical paraphernalia and accommodations for spectators.

Year by year improvements have been made at Hill Cumorah until now they include a staging area on the hillside larger than a football field with 25 stages, five miles of underground wiring for lights and sound, reservoirs holding 175,000 gallons of water for the refuelingly illuminated water curtains and other purposes, a temporary air-conditioned administration building, roomy double dressing rooms, a property shop, a work crew dormitory, a bureau of information.

THE SEATING AREA now covers five acres and the parking space 40 acres, all brilliantly lit by powerful sodium-vapor lights.

An inter-com system installed this summer links all the buildings and production units and will enable Director Harold I. Hansen to keep in constant communication with his cast of 300 actors and his various technical crews, to achieve precisely the effects he desires during rehearsals and performances.

TWO NEW FOG machines, added to the one introduced a year, will help to make even more spectacular one of the major scenes—the destruction of the City of Zarahemla.

A five-track high fidelity stereophonic sound system brings the music specially written for the Pageant by Dr. Gates, the realistic sound effects, and the one hour concert of recorded music by the Mormon Tabernacle Choir which precedes each performance.

"TO THE BEST of my knowledge, the Hill Cumorah Pageant now has the finest facilities in the world for pageant production," Director Hansen says. "We have gone to great lengths. For example, four years ago when we discovered that a house

and barn owned by the Church across the street were giving us an echo, we tore them down. This year, to create curtains of greenery on each side of the staging area on the hillside so that actors can appear and disappear, we planted \$37,500 worth of evergreens."

As in past years, a cast of 300 young Mormon men and women, mostly from the Rocky Mountain and Pacific Coast states, in

striking costumes of ancient Hebrew, Greek, Roman, Aztec and Mayan design, will enact the story of an ancient American civilization as told in the Book of Mormon.

The 25th anniversary of the colorful Pageant coincides with the 135th anniversary of the transfer of the golden plates of the Book of Mormon from the top of Hill Cumorah by the Angel Moroni to Joseph Smith.

PAGEANT DIRECTOR—Dr. Harold I. Hansen, chairman of the Speech and Dramatic Arts Dept., directs the annual Cumorah Pageant near Palmyra, N. Y. He has been sole director of the 20 performances of the music-drama since 1937.

PAGEANT COMPOSER—Dr. Crawford Gates, chairman of the Music Dept., composed the special music for the Hill Cumorah Pageant. He has written 220 original works and 300 arrangements.

N. Y. state shows good LDS growth

The LDS Church report a sharp increase in membership and construction in New York State, where the Palmyra Pageant is performed yearly.

The Church now has a total of 7,000 members in New York State compared with 5,000 four years ago.

LEADING THE Church's construction program in New York State is the 30 to 40 story skyscraper to be erected opposite the Plaza Hotel in New York City. It is scheduled for completion in 1965.

There are 30 congregations of the Church in New York State, 22 of which have chapels.

Ex 'spearman' may see pageant

A man who was a "spear-carrier" in the cast of the Palmyra Pageant more than 20 years ago may return this year as a spectator—and as a member of the President's Cabinet.

He is Stewart L. Udall, Secretary of the Interior. AS A **MORMON** missionary assigned to New York State, Mr. Udall was one who helped build up the crowd scenes as well as helped with a lot of odd jobs that have to be done to prepare for the Pageant in 1940 and 1941.

Mr. Udall said if he can work it out he would surely like to attend one of this year's performances.

Students want to go to college, but finances a block, study shows

Fifty-five per cent of the high school seniors in rural Utah communities want to attend college, according to a recent study by BYU in cooperation with the U. S. Department of Agriculture.

The study was conducted among 1909 high school seniors in Juab, Sanpete and Sevier counties. It was published in June.

DR. JOHN R. Christiansen and John W. Payne of the Department of Sociology and Anthropology and James D. Cowhig of the Economic Research Service Staff of the Department of Agriculture did the research.

Data were collected through interviews with 148 boys and 138 girls in the three counties. Of the 278 students who were interviewed, 45 per cent said they expected to enroll in college in the fall.

Ninety-two per cent of those who planned to attend actually were enrolled in college in October, 1960.

THE BOYS showed more desire to attend college than the girls. Sixty per cent of the boys wanted to go, while 49 per cent of the girls desired to enroll. Thirteen per cent of the girls sought marriage instead of college, 12 per cent wanted to enter an occupation and 10 per cent desired to attend business school.

Fourteen per cent of the boys wanted to enter an occupation instead of going to college, 13 per cent wanted to attend vocational school and five per cent planned military service.

THE MOST prominent reason given for not planning to attend college was lack of finances. Thirty-five per cent reported lack of finances, indicating they would need an average of \$350 more than they had. The researchers recommended more adequate advance planning by parents for the economic support of their children in college.

Too great a reliance on the savings of the boys and girls and financial aids provided by the colleges themselves or others

is apparent," the researchers observed.

The most prominent characteristic of youths planning to attend college is a strong desire to enroll, according to this study which was conducted in an area where 91 per cent of the residents are Mormons. The motivation came chiefly from parents, teachers, Church leaders and peers.

THE RESEARCHERS frequently found that where boys planned to attend college three or more of their five best friends also planned to attend. Also, the study found that boys aspiring to college attended three

or more Church activities each week in the month prior to being interviewed.

Both boys and girls who planned to attend college believe their parents would be disappointed if they did not go. And the youths planning college careers also reported 10 or more talks during the year with their parents about going to college, getting a job or other plans.

PERSONAL CONTACTS with representatives of colleges and universities was another significant factor which characterized rural boys and girls planning to enroll in college in the fall.

World's top music plays in Provo in joint city-Y effort

Due to the teaming up of the BYU Lyeum Committee and Provo Community Concert Association, both headed by Dr. Herald R. Clark, Provo residents and BYU students enjoy the city's finest music at the price of taxi fare to a New York concert.

THE COMMUNITY Concert Association in New York engages big name artists and sends them out to its small members. Each spring Provo's Community Concert Association aided by the BYU Lyeum Committee conducts a drive for new memberships and renewal of old memberships. The results of which determine the number of artists Provo can engage during the year.

BYU students are admitted to these concerts, usually four each year, on their student activity cards.

THE BYU Lyeum Committee, in turn, arranges concerts to which members of the Provo association are admitted on their membership cards.

Dr. Clark has been president of the BYU Lyeum Committee since 1959 and is personally acquainted with many top artists and booking agents.

"Dr. Herald R. Clark has an uncanny knack for picking out rising young stars and helping them by bringing them to Provo," said Ed Butterworth, member of the BYU's Lyeum Committee.

SOMETIMES BYU engages a huge lyeum, such as the Tabernacle Choir and the Philadelphia Orchestra, which involves a large amount of money. In order to engage them, someone must guarantee that they will be put on the players will be needed and that transportation will be paid for. This is done by the Matheson Music Foundation. Walter Matheson, once president of Geneva Steel, started this foundation, and continues to contribute, although he has retired and moved away to Geneva, Ill. With his wife Ethel. So far, all of these giant lyeums have at least broken even, according to Mr. Butterworth.

Mr. Butterworth added that Provo is world-famous for its hospitality to artists. An example of this was when the Vienna Orchestra made Provo one of its eight stops in a recent tour of the U. S. One of Dr. Clark's dreams is for the Y to have a big concert hall. Although the Philadelphia Symphony players with whom Mr. Butterworth discussed the Smith Fieldhouse as a concert hall said they could hear each other very well, it is a sports arena, which has to replace the Smith Bldg. for big concerts.

20 PE leaders to inspect Y's recreation

A group of 20 Latin American recreation leaders will visit BYU, Monday through Wednesday next week.

BYU is the only university the Latin American group will visit during a seven-week tour of the U. S.

According to a spokesman for the group, BYU was selected as a principal tour stop because of its outstanding program in youth leadership, intramural and cultural activities.

DURING THEIR STAY in Provo, members of the group will be housed in homes of faculty members and townspeople. Besides observing the BYU programs, the visitors will hike to Timp Cave.

One day will also be spent in Salt Lake City where they will tour Temple Square, Welfare Square, MIA general offices and other points of general interest in Utah.

The group, which consists of 19 men and one woman, is being directed on the tour of the U. S. by Robert Squares, director of the exchange program for the International Recreation Association.

Grad surprises, may make Minnesota football pro team

Whether or not he can make the big step into the national football league, a determined former BYU line star has impressed Coach Norm Van Brocklin and his Minnesota Viking staff in the first week of drills at their 1962 training camp.

WAYNE ASH, a 6-2, 235-pound offensive guard, checked in on July 13 with 37 other Viking rookies and has survived several cuts despite a three-year layoff from football.

And the reason? His superb physical condition, coupled with an intense desire to crack the club's 36-man playing roster.

"Boy, he came to play!" enthused Walt Yowarsky, the assistant coach in charge of the Viking offensive line, said. ASH, who is married and has two young children, has been working in a powder plant near Provo since he graduated from BYU with a BS in sociology in 1959. But a year ago he decided to take a crack at pro football.

In the 12 intervening months, Wayne added 30 pounds—all of it solid weight—by combining a high protein diet with a

weightlifting program. So, while some of his rookie mates have been sweating under the northern Minnesota sun trying to lose weight, Ash—like the third little pig who built his house of brick—hasn't had to worry either on the practice field or at the training table.

ONLY ONE offense lineman, Nebraska's Mick Tingelhoff, has proved to be faster when timed over a 50-yard distance in full football gear. Ash has run it time in 6.7 seconds, just one-tenth of a second slower than Tingelhoff.

Ash was a regular at BYU on the 1957 and 1958 Vikes' tackle, and generally is regarded as the most underrated lineman on his squad in those seasons. The Vikings signed him this spring as a free agent.

Lab school loses teacher to Chile

Dale J. Harding, fourth grade teacher at the BYU Laboratory School, has been awarded a Fulbright grant to teach elementary school in the Nido de Aguilas school in Santiago, Chile.

MR. HARDING is one of 400 to receive grants for teaching and participating in seminars abroad. Funds used in carrying out the Department of State's educational exchange programs are provided under the Fulbright Act.

He will teach in Chile for one year. He has been on the laboratory school faculty for two years. In 1961 he received his master's degree from BYU. Under executive agreements with foreign governments, programs involving American teachers are being carried out in Australia, Austria, Belgium and Luxembourg, Brazil, Burma, Chile, Columbia, Denmark, Ecuador, Finland, France, Germany, Greece, India, Italy, Japan, the Netherlands, New Zealand, Norway, Pakistan, Peru, Spain, Sweden, Turkey and the United Kingdom.
